PRICE LIST OF Mapleshade Quality GLADIOLI

Mrs. Earl Dehnhoff
VANBUREN, OHIO

Mapleshade Farm is Two Miles East of Vanburen
or One Mile South of Bairdstown
North Baltimore Phone

Gladiolus culture is very easy, as they will grow in any kind of soil. Plant large bulbs about four inches deep and five or six inches apart in the row, in good garden soil for best results. They need sunshine and will not do their best in sod, under trees or near buildings.

For cut flowers, cut in the morning and put in cold water. Change the water each day and slice off one-half inch of the stalk. They should last a week or more. The cooler the room the better they keep.

Dig bulbs in October. Cut off the tops and dry for a week. Store in a cool, dry, non-freezing place. Save and plant the small bulblets and in two or three years they will reach blooming size. The bulbs will last for years, if properly cared for. A good collection of gladioli will provide more flowers, in a greater variety of colors and at less trouble and expense than any other flower.

We advise sending orders as soon as possible after receiving this list. Of the choicer varieties our stock is limited. Every variety offered is true to name and of superior quality.

Bulbs will be sent as soon as the weather will permit in the spring.

Please write name and address very plainly.

The flowering season is July, August and September. Visitors are always welcome.

All bulbs are first class quality. A trial will convince you.

Everything quoted is always sent POSTPAID.

Size A—1¼ inch and up (will bloom).

Size B—¾ inch (will bloom).

Size C—½ inch (will bloom if given a good chance).

Bulblets—Plump stock, hand cleaned and counted.

12 bulbs at 10 times the single price.

6 bulbs at 5 times the single price.

25 bulbs at the 100 rate.

Bulblets furnished in small amounts for trial plots.
